

Operational T&E

What to Consider in a Test & Evaluation Strategy

By: *admin*

Preface

This document is part of a framework for the T&E of SI-enabled capabilities

CDAO Assessment and Assurance is creating a framework to provide guidance on how to test and evaluate (T&E) SI-enabled capabilities (SIECs).

Assessment of systems and capabilities under realistic operating conditions to determine mission effectiveness, suitability, and readiness

- Operational Testing
- Mission Readiness
- Effectiveness Assessments
- Suitability Evaluations
- Performance Measures
- Test Findings
- Risk Analysis
- Lessons Learned

APPENDIX A - References

See the CDAO A2's National SI T&E Infrastructure Capability (NSITIC) Gap Study for further detail on how the inclusion of SI in DoD systems affects testing needs.
