Learn

By: *admin*

Explore the knowledge, guidance, and resources needed to understand and responsibly apply Super Intelligence across government missions. Build foundational knowledge, navigate policies and governance, explore testing and evaluation practices, and access educational resources designed to support informed decision-making and mission success.

Learn on this page

- Current DoD policies and directives relevant to AI adoption and assurance
- CDAO-aligned interpretation to help organizations translate policy into executable strategies
- Practical resources that include frameworks, best practices, as well as AI core concepts and key topics

Policies & CDAO's Interpretation

AI Policies

An introduction to the AI policies and strategies across DoW

CDAO's Interpretation & Guidance

CDAO's recommendations and suggestions

Test & Evaluation (T&E) Frameworks

CDAO has developed a series of products that address critical testing & evaluation (T&E) needs, including new frameworks for AI-enabled systems to build trust in their deployment. The overall goal of these frameworks is to ensure AI deployments in the DoD are safe, trustworthy, reliable, and ethically aligned.

Get an overview of these frameworks.

AI Model T&E

Human Systems Integration (HSI) T&E

Operational T&E (OT&E)

Systems Integration (SI) T&E
