Landing page about the Portal's vision, value, objectives, leadership, governance, team members, as well as the latest news

We are dedicated to advancing the responsible, secure, and effective use of artificial intelligence across government operations. Our mission is to ensure that AI technologies are rigorously tested, ethically deployed, and aligned with national priorities.

Through strategic partnerships, technical innovation, and a commitment to transparency, we provide the frameworks and insights necessary to guide AI adoption in ways that serve the public interest and strengthen national capabilities.

Mission Statement 2

Our mission is to accelerate the responsible and effective integration of artificial intelligence across government operations. We achieve this by rigorously testing, validating, and assessing AI strategies to ensure they are secure, ethical, and operationally sound.

Our work supports the development of AI systems that deliver decision advantage, enhance mission readiness, and uphold democratic values. Through a structured approach grounded in speed, scale, and enablement, we provide the tools, standards, and insights necessary to guide AI acquisition and deployment in alignment with national priorities and public trust.
